

William Stewart

Brookline, MA | (207) 714-0155 | wstew1055@gmail.com

Education

Wentworth Institute of Technology

Bachelor of Science in Computer Science - August 2026

Relevant Coursework: Data Structures & Algorithms, Database Management, Software Engineering, Parallel Computing, Network Programming, Operating Systems

Technical Skills

Languages: Java, Python, SQL, JavaScript, C

Backend: Spring Boot, FastAPI, REST APIs, JPA/Hibernate, SQLAlchemy

Frontend: React, HTML/CSS, Liquid

Databases: PostgreSQL, Redis, SQLite, MySQL

Cloud & Platforms: AWS, Microsoft Power Platform, Power Pages, Dataverse

Testing & Development: JUnit, Testcontainers, CI/CD, Git, Docker, Maven

Experience

Wentworth Institute of Technology | Digital Innovation Support Specialist Co-op

May 2025 - August 2026

- Led implementation of a university-wide software directory using Microsoft Power Pages and Dataverse, configuring security, web roles, and permissions to support controlled access.
- Developed dynamic web interfaces using HTML, CSS, JavaScript, and Liquid templates, including search filtering and software-detail functionality.
- Managed technical support tickets through ServiceNow, providing troubleshooting and technical support for digital initiatives.

Harvard University | Technical Support Specialist Co-op

September 2025 - December 2025

- Imaged, configured, and deployed computers in a high-volume enterprise environment.
 - Diagnosed hardware and software issues, performing troubleshooting and determining when systems required warranty evaluation or replacement.
 - Supported inventory, asset tracking, and equipment lifecycle operations while coordinating device deployments across teams.
-

Projects

Distributed Job Queue | Java, Spring Boot, PostgreSQL, Redis, Docker, JUnit, Testcontainers | 2026

- Built a backend job-processing system using Java and Spring Boot to accept, persist, queue and process asynchronous jobs.
- Implemented thread-safe job queues and concurrent worker processing to coordinate job execution across multiple workers.
- Integrated PostgreSQL for persistent job data and Redis for queue and caching functionality.
- Integrated automated JUnit unit tests and Testcontainers integration tests to validate application behavior against real containerized dependencies.

Interactive Timeline | Java, Spring Boot, React, PostgreSQL, Docker | 2026

- Developed a full-stack web application using Spring Boot REST APIs and a React frontend to manage and display timeline-based content.
 - Implemented controller, service, repository, entity, and DTO layers to separate API, business, persistence, and data transfer responsibilities.
 - Connected the React frontend to backend REST endpoints for dynamic retrieval and presentation of application data.
-

Leadership

Wentworth Institute of Technology Varsity Indoor & Outdoor Track and Field - Team Captain | 2022 - 2026
